Research Letters

Nitro reaction in mice injected with pyrene during exposure to nitrogen dioxide
by T. Kanoh, M. Fukuda, E. Hayami, T. Kinouchi, K. Nishifuji and Y. Ohnishi (Japan) 1
Hypotonic treatment leads to chromosomal aberrations but not to sister-chromatid exchanges in human lymphocytes
by S. Kalweit, C. Nowak and G. Obe (Germany, F.R.G.) 5
Effect of multiple dosing of phenacetin on micronucleus induction: a supplement to the International and Japanese cooperative studies
by S. Sutou, Y. Mitui, S. Toda, M. Sekijima, K. Kawasaki, N. Ando, T. Kawata, S.-i. Abe, M. Iwai and H. Arimura (Japan) 11
The mutagenic modulating effect of *p*-phenylenediamine on the oxidation of *o*- or *m*-phenylenediamine with hydrogen peroxide in the Salmonella test
by T. Watanabe, T. Hirayama and S. Fukui (Japan) 15
Further evidence that eugenol does not bind to DNA in vivo
by D.H. Phillips (Great Britain) 23
Interaction of Mesna (2-mercaptoethane sulfonate) with the mutagenicity of cyclophosphamide in vitro and in vivo
by J. Lähdetie, R. Räty and M. Sorsa (Finland) 27
Frequency of micronuclei induced in peripheral lymphocytes by trimethyltin chloride
by B.B. Ghosh, G. Talukder and A. Sharma (India) 33
Direct-acting mutagenic properties of some hair dyes used in New Zealand
by L.R. Ferguson, A.M. Roberton and J. Berriman (New Zealand) 41
Evidence for a radioprotective effect of chlorophyllin in Drosophila
by S. Zimmering, O. Olvera, M.E. Hernández, M.P. Cruces, C. Arceo and E. Pimental (U.S.A., México) 47
The structural basis of the carcinogenic and mutagenic potentials of phytoalexins
by H.S. Rosenkranz and G. Klopman (U.S.A.) 51
Use of DNA purified in situ from cells embedded in agarose plugs for the molecular analysis of $tk^{-/-}$ mutants recovered in the L5178Y $tk^{+/-}$ 3.7.2C mutagen assay system
by M. Applegate, G. Juhn, M. Moore and J. Hozier (U.S.A.) 55
Chromosomal aberrations, sister-chromatid exchanges, cell-cycle kinetics and satellite associations in human lymphocyte cultures exposed to vanadium pentoxide
by R.E. Roldán and L.M.A. Altamirano (Mexico) 61
Preventive action of thioethers towards in vitro DNA binding and mutagenesis in *E. coli* K12 by alkylating agents
by E.D. Kroese, M.J. Zeilmaker, G.R. Mohn and J.H.N. Meerman (The Netherlands) 67
Mutations induced by benzo[*a*]pyrene diolepoxide at the *hprt* locus in human T-lymphocytes in vitro
by B. Andersson and B. Lambert (Sweden) 75
Unscheduled DNA synthesis in growing roots and stored embryos of *Vicia faba* after the action of maleic hydrazide and methyl methanesulphonate
by G. Murín (Czechoslovakia) 83
Sensitivity of *Salmonella typhimurium* YG1024 to urine mutagenicity caused by cigarette smoking
by P. Einistö, T. Nohmi, M. Watanabe and M. Ishidate Jr. (Finland, Japan) 87
Investigations on mutagenicity and genotoxicity of pentamidine and some related trypanocidal diamidines
by I. Stauffert, H. Paulini, U. Steinmann, H. Sippel and C.-J. Estler (F.R.G.) 93
Antimutagenic action of cobaltous chloride on radiation-induced mutations in cultured Chinese hamster cells
by A. Yokoiyama, T. Kada and Yu. Kuroda (Japan) 99
Ratio of acentrics to dicentrics in human lymphocytes exposed to X rays and misonidazole
by N. Vulpis and M. Coppola (Italy) 107

0165-7992/90/$03.50 © 1990 Elsevier Science Publishers B.V. (Biomedical Division)

Effects of bile salts on the adsorption of a hydrophobic mutagen to dietary fiber
by L.R. Ferguson, P.J. Harris, H.J. Hollands and A.M. Roberton (New Zealand) 111
Genotoxic effects of thiram evaluated by sister-chromatid exchanges in human lymphocytes
by M. Pienkowska and M. Zielenska (Poland) 119
Fluctuation tests are more sensitive than plate tests in detection of chemicals which cause enhanced excision of transposon Tn*10* in*Salmonella typhimurium*
by L.M. Hafner and D.G. MacPhee (Australia) 125
Reduction of the mutagenicity of lead chromate-based pigments by encapsulation with silica
by T.H. Connor and S.M. Pier (U.S.A.) 129
Corrigendum 135
Announcement 136
The effect of sampling time on radiation-induced translocation yield in spermatogonial stem cells of male mice, differing in chromosomal constitution and sexual activity
by M.C.A. Wessels-Kaalen, R. Bakker and P. de Boer (The Netherlands) 137
Induction of DNA-repair synthesis in primary rat hepatocytes by epoxides
by W. von der Hude, R. Mateblowski and A. Basler (Germany) 145
Cloning of the *E. coli* O-acetylserine sulfhydrylase gene: ability of the clone to produce a mutagenic product from azide and O-acetylserine
by W.M. Owais and R. Gharaibeh (Kuwait, Jordan) 151
Differential assay and biological significance of poly(ADP-ribose) polymerase activity in isolated liver nuclei
by C.F. Cesarone, L. Scarabelli, P. Giannoni and M. Orunesu (Italy) 157
Chirality-dependent DNA reactivity as the possible cause of the differential mutagenicity of the two components in an enantiomeric pair of epoxides
by J.P. Seiler (Switzerland) 165
Sensitivity of fibroblasts derived from ataxia-telangiectasia patients to calicheamicin γ_1^I
by N. Sullivan and L. Lyne (Great Britain) 171
Evaluation of the mutagenicity of combustion particles from several common biomass fuels in the Ames/Salmonella microsome test
by D.A. Bell and R.M. Kamens (U.S.A.) 177
Role of sulfation and acetylation in the activation of 2-hydroxyamino-1-methyl-6-phenylimidazo[4,5-*b*]pyridine to intermediates which bind DNA
by M.H. Buonarati, K.W. Turteltaub, N.H. Shen and J.S. Felton (U.S.A.) 185
Methyl vinyl sulphone: A new class of Michael-type genotoxin
by T.J. Warr, J.M. Parry, R.D. Callander and J. Ashby (Great Britain) 191
Growth delay and filamentation of *Escherichia coli* wild-type and Rec A cells in response to hexavalent chromium and other metal compounds
by G. Brandi, G.F. Schiavano, A. Albano, F. Cattabeni and O. Cantoni (Italy) 201
Severe chromosomal damage in mammalian cells induced by pulse labeling with small amounts of [^{3}H]thymidine
by B. Färber and V. Kinzel (F.R.G.) 205
Persistence of azacytidine-induced SCEs and genomic methylation in CHO cells in vitro
by P. Perticone, F. Palitti, R. Cozzi, M. D'Erme and R. Bona (Italy) 211
Effects of in vivo exposure to antineoplastic drugs on DNA repair and replication in human lymphocytes
by L. Celotti, R. Biasin, P. Ferraro and M. Fiorentino (Italy) 217
Inactivity of copper sulphate in a mouse bone-marrow micronucleus assay
by H. Tinwell and J. Ashby (Great Britain) 223
Activity of urethane and *N,N*-dimethylurethane in the mouse bone-marrow micronucleus assay: Equivalence of oral and intraperitoneal routes of exposure
by J. Ashby, H. Tinwell and R.D. Callander (Great Britain) 227
The micronucleus assay in *Anodonta cygnea* for the detection of drinking water mutagenicity
by R. Scarpato, L. Migliore and R. Barale (Italy) 231
Methapyrilene: DNA as a possible target
by H.S. Rosenkranz and G. Klopman (U.S.A.) 239
The micronucleus assay with mouse peripheral blood reticulocytes using acridine orange-coated slides
by M. Hayashi, T. Morita, Y. Kodama, T. Sofuni and M. Ishidate Jr. (Japan) 245

N-2 Acetylation of 2′-deoxyguanosine by coffee mutagens, methylglyoxal and hydrogen peroxide
by H. Nukaya, T. Iwami, H. Ishida, K. Tsuji, Y. Suwa, K. Wakabayashi, M. Nagao, T. Sugimura and T. Kosuge (Japan, New Zealand) 251
Mutagenic effects photoinduced in normal human lymphoblasts by a monofunctional pyridopsoralen in comparison to 8-methoxypsoralen
by D. Papadopoulo and E. Moustacchi (France) 259
The effect of multi-locus deletions in heterozygotes; a model study using Drosophila
by J.C.J. Eeken and F.H. Sobels (The Netherlands) 267
Mutagenicity of mononitrodihydrobenzo[*a*]pyrenes
by P.P. Fu, H. Jung, L.S. Von Tungeln and R.H. Heflich (U.S.A.) 277
Influence of DNA repair deficiencies on the UV sensitivity of yeast cells in different cell cycle stages
by W. Siede and E.C. Friedberg (U.S.A.) 287
Comparison of sister-chromatid exchange frequencies in mouse T- and B-lymphocytes after exposure to 4-hydroxycyclophosphamide or phosphoramide mustard
by P. Kwanyuen, G.L. Erexson, M.F. Bryant and A.D. Kligerman (U.S.A.) 293
Chromosome aberrations in rotogravure printing plant workers
by D. Pelclová, P. Rössner and J. Picková (Czechoslovakia) 299
pHAZE: A shuttle vector system for the detection and analysis of ionizing radiation-induced mutations
by L.H. Lutze and R.A. Winegar (U.S.A.) 305
Induction of chromosome damage by aniline and its C-hydroxylated metabolites in the root cells of *Vicia faba*
by N. Kanaya (Japan) 311
Contents, Vol. 245 (1990 317
